► EMPLOYMENT

Front End Developer Intern

July 2020 - Oct. 2020

Rantai

Jakarta, Indonesia

- Reduced server load of the chat feature by 3% by creating a more efficient Multimedia Messaging System which compresses sent image until downloaded without sacrificing image quality from scratch using Java and Picasso.
- Improved user experience on tablets by maximizing the larger screen to implement a more aesthetically pleasing UI and optimized layout to change based on orientation preventing a stretched UI look.
- Enabled multi language support for the app by providing human translations for English and Indonesian and switch to machine translation for other language to allow the app to reach a global market.

Junior Java Programmer Intern

July 2019 - Sept. 2019

Cyberindo Sinergy Sistem

Jakarta, Indonesia

- Developed financial module for supply chain application using Selenium and MySQL Consists of automated payment checking through e-banking and updating database which reduces human error.
- Created the customer service instant messaging software for the client to report issues immediately using Jetty.
- Implemented a basic UI made with JavaFX to make it look more appealing for clients which displays order details, pending or completed, in table format and user-friendly as it only requires a single button to run.

► ACTIVITIES

Volunteer Conversation Leader

Nov. 2019 - Present

English-In-Action

- Aided other international students to improve their English-speaking skills or vocabulary significantly.
 - Improved the confidence of students for job interviews by letting them practice interviews, before career fairs.
